## ***Press Release***

For Immediate Release

### **Arrival of two new owners at Minetec**

**Montreal, February 22, 2022** – Following the departure of our former president for a well-deserved retirement, Minetec wishes to welcome two new shareholders into our folds, Alexandre Daoust and Jean-Sebastien Dufour.

In addition to ensuring our future commitment, Jean-Sébastien and Alexandre will help Minetec navigate its transition in a transformational environment. They bring considerable experience and technical expertise in the field of automation.

#### **Jean-Sebastien Dufour, Production Supervisor**

Jean-Sébastien has strong expertise in the electrical field. Holder of a DEC in electrodynamic technology from the Ahuntsic College, he has accumulated over 15 years as a project technician, engineering supervisor and production supervisor.

For Jean-Sebastien, being part of the next generation of Minetec is a great honor. “I am starting this new chapter of my career with great enthusiasm.

In a market like ours, it is no longer enough to simply meet demand. It takes an attention to detail and high-quality, competitive products. I am convinced that this can be done without losing sight of the human beings, who are the heart of a company.”

## **Alexandre Daoust, Project and Bid Supervisor**

As with his colleague, Alexandre eagerly anticipates the challenges that await him in his new role. “My goal is to work closely with our clients to define their needs, expectations and the desired results. We have a flexible, quick and energetic team. I can't wait to grow alongside them.”

Alexandre has been in the electrical field for years. Growing up in a family of technicians, he quickly fell in love with this ever-changing industry. He holds a DEC in industrial electronic technology from Collège Ahuntsic and held several positions at Minetec before becoming a project and bid supervisor, notably as a cabler, project manager and production planner.

We are convinced that Jean-Sébastien and Alexandre will be able to put their expertise to good use and serve our current and future customers well. To contact them:

Jean-Sébastien Dufour  
Production supervisor
